### FEATUES

The Edis 135inch LED displays Android 200W speakers and mobile stand All-in-One, Plug and go, Smart LED Display with Built-in 200 Watt Speakers. The Edis 30017 series of 135" LED Displays is an all-in-one plug and go system including an embedded controller, Android OS and built-in 200 Watt stereo speaker system. Contrary to the concept that LED displays are difficult and complex to install, no controller connections or module configuration are needed. After a simple installation process, all you need to do is to turn on the screen with a remote control like a home TV. The Edis 30017 series displays are available in several configurations with or without built-in speakers, with or without a mobile stand and with or without Android OS to match your needs in terms of function and budget for the home, commercial or education. Compatible with AV Control Systems. The Edis 30017 series is compatible with professional AV controls for seamless integration and auto-control, creating the ideal business environment for professionals. Support and maintenance is easy and fast with full online and direct access to support staff with remote access to your system if needed. High Performance with Android. Built-in Android OS System executes several tasks at once for smooth content playback and access APPs, TV and online streaming etc. Quick Maintenance. In case of module failure or damage our front access system enables fast replacement from the spare 5 free modules supplied with each display. The LED module can be simply removed with a magnetic LED module tool and replaced quickly with no cabling involved. Wireless Screen Share. Wireless screen sharing is available using a USB wireless dongle on the users PC/laptop to share personal PC screen to the display with embedded Wi-Fi, and can be used to adjust basic settings such as (volume, picture mode, auto bright, etc). Easy Installation. Installation of the All-in-One 30017 Smart series is very simple. After securing cabinets simply plug in the power cable.
