

22x Optical 10x Digital Zoom Visualiser A3 Size

SKU:

EAN:

FEATUES

This Visual Presenter has camera, image system process (ISP) and power all in one. It can be used to display a wide range of materials by connecting to a proper display device. This product is equipped with 2.0 Mega pixels CMOS. When this Visualiser is not connected with power source, the power can be received from the computer USB connection

● Easy to Adjust

The Focus/Iris/White Balance are automatically adjusted. These functions can also be adjusted manually to best fit user's needs. Fast Auto-Focus, Images will be auto-focused in only 1~2 seconds. 22X Optical camera zoom enlarge the shooting zone.

● Image Freeze

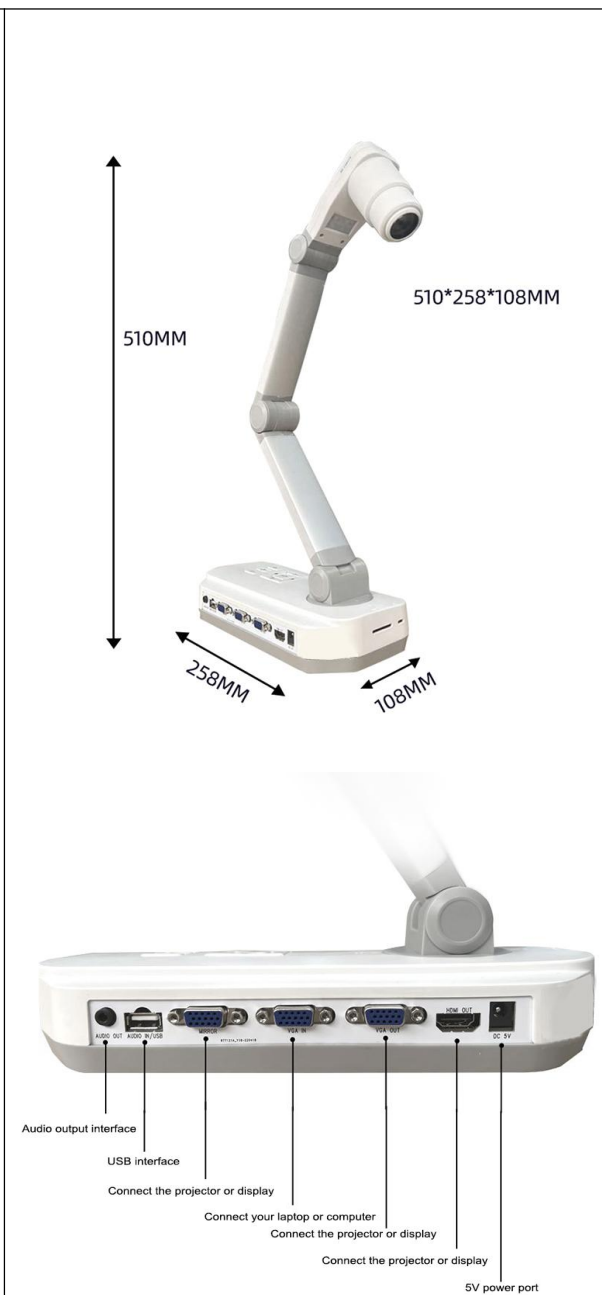

Make the images become still on the screen. The multi-scene feature allows multiple images to be shown at the same time. Image Rotation, The displayed image can be rotated by 180°. The camera stand has multiple joints and is highly versatile. When the camera stand is positioned vertically, the camera head can rotate 330° (upward and downward).

● Image Storage and Retrieval

Images can be stored in the Visual Presenter for review at a later time. The Visual Presenter can be connected to a computer using a RS232 cable. After installing the CD-ROM provided on your computer, you can control the operation of the Visual Presenter on the computer.

● Built-in Image Switch

The built-in image switch allows easy swap between the Visual Presenter and the other image device input. Plug the microphone cord into the microphone inlet on the Side Connection Plate to amplify the sound during presentation. The user's presentation sound can be blended with the background sound, e.g. music from computer.
