

Cell phone Protective screens

SKU: Protective screen EAN:

FEATUES

The Edis Cell phone Protective screens is Super 9H hardness toughened glass protective film, 4 layers of anti-scratch, anti-fingerprint protective film, optical silicone glue, optical PET coating film, toughened glass, nano coating, anti-shatter foam film, suitable for all mobile phones, not limited to a single brand or model. Available in retail packaging with 1 to 3 protective covers per pack or in bulk packaging for commercial repair services. The anti-fall performance provides protection when the cell phone is dropped and the new design copes easily with the prospect of daily scratching of the surface. The screen cutting technology ensures an accurate fit of the whole screen. Maintains true colours without degradation. Includes optical anti-reflection layer, effectively eliminating reflection, making the picture clearer and brighter. The glass reduces fingerprint residue. Does not block face recognition. The 9H hardness of the glass is explosion-proof and anti-fall properties, maintains sensitive touch. The large arc edge fully fits without creating a white edge, safe handling. The glass cover effectively reduces damage to your mobile phone and feels good to handle.
