

EC188 4k Track and Frame AI Webcam V2

SKU: 0200188-4k V2 EAN:

FEATUES

● 3 Level adjustable Ring Fill light

The built-in ring light offers 3-level color temperatures and stepless brightness adjustment with touch control.

● Auto-Framing and Auto Exposure

Whether you're presenting alone, as a group or moving around, the EC188v2 depth sensing and facial recognition tracks and adjusts composition to ensure your image is kept in front, in-center with correct exposure.

● Shine Bright in low light

When working late or calling clients in different time zones, the HD webcam's AI-powered auto low-light correction kicks in to ensure you stand out, even in poor lighting conditions.

● Artificial intelligence gestures

AI gesture recognition, an action that knows what you're thinking, and when it's difficult to move or speak, you can make those actions to achieve the preset scene.

● Fast and accurate autofocus

Auto focus when moving, easy to get clear video. Built in dual noise reduction microphone gives you clear and natural sound.

SPECIFICATION

Image sensor	CMOS 1 / 2.5"
Resolution maxi	2160p. (4K) 30fps
Lens	FOV 120°
Speed at 4K resolution	30fps
Video Output Max 4K	30 fps
