

Wireless microphone with Bluetooth

SKU:

EAN:

FEATUES

● Multifunction control microphone

Light and portable, set function control key in the tube body, more convenient operation. Long transmission distance, UHF frequency band signal transmission on startup, anti-interference.

● Multi-device compatibility

Devices with MIC input interface can be connected to use.

● Metal anti-fall net head

The metal mesh cover can effectively protect the sound pickup core and effectively prevent falling.

● 5.0 BLUETOOTH-CONNECTION

Bluetooth can be connected with devices with Bluetooth transmitting function such as mobile phones, computers and TVs, and transmit accompaniment music to the receiver through wireless Bluetooth, and then transmit the accompaniment and vocals to the connected audio equipment through the receiver for playback, avoiding cumbersome wired connections.

SPECIFICATION

| | |
|--------------------------|-------------------|
| Built-in lithium battery | 1860 |
| Battery life | about 8 hours |
| Weight | 0.8 kg |
| Dimensions | 303 * 192 * 60 mm |
| Frequency band | UHF |
| Signal to noise ratio | > 70dB |
| Distortion | < 0.5% |
| Operating frequency band | 50 * 2 |
| Frequency response | 50-18 kHz |
| Delay | > 3 ms |
| Reception distance | 30 m |
